

Name:

UI Replication Activity

General Instructions: Recreate the provided **Shopee Philippines product list UI** in Angular from scratch. Your output must demonstrate proper use of Angular components, HTML/CSS styling, TypeScript variables and data types, interpolation, arrays, **ngFor*, event binding, and functions.

Grading Criteria:

Criteria	Description	Points	Score
UI Replication & Styling	Accurately reproduces the reference UI's layout, product grid, spacing, sizing, typography, colors, cards, and major visual elements using HTML and CSS.	25	
Angular Structure & Syntax	Correctly structures the application using Angular components and demonstrates proper Angular/HTML syntax.	10	
TypeScript Variables & Data Types	Product information is stored in TypeScript variables/objects using appropriate data types rather than being directly hardcoded into the template.	15	
Interpolation	Correctly uses <code>{{ }}</code> to display dynamic product information throughout the interface.	15	
Arrays & <code>*ngFor</code>	Uses an array containing multiple product objects and <code>*ngFor</code> to dynamically render the product cards.	15	
Event Binding	Correctly uses event binding such as <code>(click)</code> to respond to user interactions.	5	
Functions & Logic	Implements functions that perform the intended action when users interact with the interface.	10	
Fallback / Missing Data	Provides an appropriate fallback when product information is unavailable or missing.	5
